

SECONDARY MODIFIERS SUPPLMENTAL APPLICATION

Secondary Modifiers are additional risk characteristics, other than those requested in the normal underwriting application, which have a meaningful impact on modelling your risk in our portfolio. With the collection of this information, we are able to offer more precise, and often more competitive, pricing for your Coastal risks:

Please Check all that apply for the following questions:

1. ROOF ANCHOR:

- | | |
|--|---------------------------------------|
| <input type="checkbox"/> Other/Unknown | <input type="checkbox"/> Single Wraps |
| <input type="checkbox"/> Structural | <input type="checkbox"/> Clips |
