

## Access State Fund – Contractors

### Wildfire Disaster Debris Removal/Clean Up

Our Amwins Access State Fund team is here to help with all workers compensation placements with the CA State Fund. With the recent tragic and devastating wildfires in CA, debris removal, demolition, clean-up, and restoration contractors will need your guidance to place their workers compensation insurance. This includes contractors who specialize in these operations, those who add this type of work to their existing operations and new ventures. We encourage you to reach out to your dedicated Access State Fund team to discuss these clients as we can assist with contractors engaged in these operations.

Disaster debris removal, demolition, cleanup, and restoration operations can be classified under several classifications based on the actual scope of the employer's operations. The CA State Fund will write these workers compensation exposures and classifications while many private workers compensation carriers will not. We encourage you to talk with your contractor clients to discuss their current and planned operations to identify those who may be taking on these new exposures. Once identified, please reach out to our Access State Fund team as we are available to help you with these workers compensation placements.

Sincerely,

Your Access State Fund Team

Applications and supplementals can be found on our website at [www.amwins.com/asf](http://www.amwins.com/asf)
